KEELY STILL WORKING

and He Now Claims That His Meter Will Astonish the World.

PHILADELPHIA, April 27 .- Keely, of mofor fame, is by no means dead, and it is among the possibilities of the near future that he will yet astonish the scientific world with his motor. He is now engaged trecting a new vibratory vertical engine. which he expects to complete in a short time. A correspondent saw the machine yesterday, and gained considerable information regarding its peculiar construction. but was unable to learn the secret of the motor-something that the wonderful man keeps securely locked in his breast. In fact he is so jealous of his pet that he makes portions of the secret work himself. The new engine is exceedingly bulky, as will be noted by the dimensions, which are

The bed plate upon which it rests is 12 feet by 6, of east iron and weighs 4,400, pounds. The apparatus resembles an orange pierced by a pencil, and then suspended upon two uprights. These uprights are denominated standards, and weigh 3,200 pounds each. The standard at the right hand supports a steel shaft nine inches in thickness. This is stationary, and suspended upon the end of it is an iron disk weighing 600 pounds. To this disk is attached a cylinder containing the secret method for giving the power. Connected with the cylinder are ten wrought-iron tubes, three feet long, weighing 150 pounds each. At the left-hand side of the tubes is a steel disk half an inch in thickness, containing 230 steel pins driven in about an eighth of an inch from the periphery. These are placed equi-distant with mathematical precision, and taper in length from five to two and one-builf inches. This portion of the machine has much the appearance of a long key board, such as one sees in a piano, The standard or pillar at the left hand supports a nine inch shaft, which is not stationary. To this shaft is attached by means of set screws an iron shell or sphere made in four sections. The shell covers all the machinery described above except the shaft. The diameter of the sphere is sixty-six inches, inside measurement. The weight of the shell is about 10,000 pounds. and the central section is cast so as to accommodate a forty-inch faced ball. It is to revolve upon the movable shaft at the left end, and turn around the machinery that is contained inside of it. In fact, the shell is to be the driving wheel, and is to be propelled by the force communicated to it from the interior. This force, or the elements producing it, reaches the inside of the shell by passing through a minute aperture in the stationary shaft into the disk, the secret cylinder and the tubes. From there the power is dispensed and the sphere made to revolve. The small engine, of which the one now in course of erection is an exact copy, has been made to operate, and Keely believes that he has found the true method now. It is claimed that the present is a simplified and modified form of the vibratory engine, and, as it combines two things, has been named vibratory vertical engine. It will weigh about seventeen tons when completed. It differs very materially from other engines and motors. The principal characteristics are that no heat is envolved, and there is no exhaust. If it is a success, good-by to steam-power.

Putting On a New Nose.

INDIANAPOLIS, April 27 .- The other day a vicious herse bit off B, Hexter's nose, and a new one is being furnished him at the surgical institute in this wise: The measurement of the nose was outlined on the fleshy portion of the right palm, and the skin partially raised. This pattern was then fitted to the trame work of the nose like a ball cover, and the hand tied fast to the nose. It will remain in this position for ten days, until the skin of the hand is thoroughly tran planted upon the nose, Then the new nose will be cut from the hand, and nature will do the rest. Mr. Hexter will lose a piece of his hand, but is assured by the dectors that he will gain a complete nose, warranted to "blow" per-

A Good Day for Turtles.

GLOUCESTER, MASS., April 27 .- Captain Augustus G. Hall and the crew of the schooner Annie L. Hall vouch for the following: "On March 30, while on the grand bank in latitude 40 degrees 10 seconds, longitude 33 degrees, they discovered an immense live trunk turtle, which was at first thought to be a vessel, bottom up. The schooner passed within twenty-five feet of the monster, and those on board had ample opportunity to estimate its dimensions by a comparison with the length of the schooner. The turtle was at least forty feet long, thirty wide, and thirty feet from the apex of the back to the bottom of the under shell. The flippers were twenty feet long. It was not deemed advisable to attempt its capture,"

Tewkesbury Defended.

Boston, April 27-Dr. A. G. Tucker, of Australia, who has examined nearly all the insane asylums of the country, visited the insane ward at Tewkesbury two weeks ago. He saw every patient, and found everything remarkably clean. He found only seven persons to care for 260 patients, but was told that the appropriation would allow no more. The inmates were neat and clean. He thought it improper that female patients should have male attendants, which was one of the greatest evils at Tewkesbury. Witness would have the insane at Tewkesbury amused or employed constantly. The mode of restraint there was the same as is employed at other inal fetions.

Bramatic Festival Notes.

CINCINNATI, April 27 .- John Simpkinson, Vice President of the Dramatic Festival Association, will retire from the association after the Festival is over. He says he is not influenced to take this course by the criticism of the ministers. He has helped to put the Dramatic Festival upon a firm basis, and now wants to

give way to younger men. The great drop curtain for the Dramatic Festival arrived this morning, and will be hung to-morrow. It is the largest ever painted in America, covering sixty by fifty feet of canvas. There is one curtain at Paris that is a fraction larger. The curtain was painted by Henry E. Hoyt, of the Grand opera-house. New York. The cost is between \$1,800 and \$2,000. The picture in the center of the curtain is 40 by 25 feet, and ilinstrates the departure of Regulus from Rome. It is from an old painting by Benamin West.

All the properties, made in New York, and valued at \$20,000, have also arrived. and the association advertise for a large room where they can be stored with safety.

Did Not Want to be Any Trouble.

MILWAUKEE, April 27 .- Patrick Finerty, of Green Bay, was yesterday sentenced to fifteen days in jail for selling liquor to Indians. The Court adjourned and the commitment papers were made out when the Sheriff discovered that the prismer was missing. A telegram from Green Bay to-day states that Finerty came straight home and applied to the jail to spend the allotted fifteen days. The documents, therefore, were forwarded by mail.

Child Burned to Death.

LOUISVILLE, April 27 .- George Hoeyer, a gardener who lives several miles out on the Baids own pike, put one of his children to burning stubble and straw, and directed the smaller ones to keep away. One of the younger children, however, ventured too rear the flames, its clothes caught, and, hough Mr. Hoeyer burnt his own hands freadfully in trying to get the burning clothing off the little one, the sufferer was fatally injured.

Printer's Strike at St. Paul.

Sr. PAUL, MINN., April 27 .- This evening thirty-two compositors in the office of the Globe struck because the proprietor refused to be dictated to by the men, who insisted that the printers setting "ads" and markets should pay a bonus to the other compositors. The Globe is a none-union office, but pays forty cents per thousand ems, the highest price in the state.

Chloreformed by Eurglars.

Wheeling, W. Va., April 27 .- At halfpast 8 to-night the house of F. G. Cline, of the Belmont Mill, on Market street, was entered by burglars. Mr. Cline was on duty at the mill. Mrs. Cline and her two children were chloroformed, and over \$200 in money, a valuable watch, and other jewelry were taken. Mrs. Cling is in a dangerous condition from the effects of the chloroform, and may die.

AYER'S Sarsaparilla

cures Rheumatism, Neuralgia, Rheumatic Gout, General Debility, Catarrh, and all disorders caused by a thin and impoverished, or corrupted, condition of the blood; expelling the blood-poisons from the system, enriching and renewing the blood, and restoring its vitalizing power.

During a long period of unparalleled usefulness, AVER'S SARSAPARILLA has proven its perfect adaptation to the cure of all diseases originating in poor blood and a weakened vitality. It is a highly concentrated extract of Sarsaparilla and other blood-purifying roots. combined with Iodide of Potassium and Iron, and is the safest, most reliable, and most economical blood-purifier and blood-food that can be used.

Inflammatory Rheumatism Cured. "AYER'S SARSAPARILLA has cured me of the Inflammatory Rheumatism, with which I have suffered for many years. W. H. Moore." Durham, Ia., March 2, 1882.

"Eight years ago I had an attack of Rheumatism so severe that I could not move from the bed, or dress, without help. I tried several remedies without much if any relief, until I took AYER'S SAESAPARILLA, by the use of two bottles of which I was completely cured. I have not been troubled with the Rheumatism since. Have sold large quantities of your SAESAPARILLA, and it still retains its wonderful popularity. The many notable cures it has effected in this vicinity convince me that it is the best blood medicine ever offered to the public. E. F. HARRIS."

River St., Buckland, Mass., May 13, 1882.

"Last March I was so weak from general de "Last March I was so weak from general de-bility that I could not walk without help. Fol-lowing the advice of a friend, I commenced taking AYER'S SARSAPARILLA, and before I had used three bottles I felt as well as I ever did in my life. I have been at work now for two months, and think your SARSAPARILLA the greatest blood medicine in the world. JAMES MAYNARD." 520 West 42d St., New York, July 19, 1882.

AVER'S SARSAPARILLA cures Scrofula and all Scrofulous Complaints, Erysipelas, Eczema, Ringworm, Blotches, Sores, Boils, Tumors, and Eruptions of the Skin. It clears the blood of all impurities, aids digestion, stimulates the action of the bowels, and thus restores vitality and strengthens the whole system.
